PFS Launches WebApp It's a Click Away

"WebApp is a new, efficient program that provides PFS client-manufacturers continuous up-to-date information on the state and national code issues and technical developments they need for ease and accuracy of product design and plan submittal," announces Michael J. Slifka, PE, PFS President.

WebApp is accessible on the PFS Intranet for all PFS client-manufacturers, modular builders and HUD-Code home manufacturers alike.

An important feature of WebApp is its comprehensive reference library. The following reference documents which are updated regularly are accessible to PFS client users on WebApp:

- IPIA Alerts
- DC Letters
- Modular Letters
- Insignia Information
- State Codes

Client-manufacturers may request login information from the PFS website, www.pfscorporation.com. Click the icon on the home page that is similar to the one shown at the bottom of this page, and Cathy Putnam will send confidential login information promptly.

Anyone needing additional or more detailed instructions is encouraged to contact:

**Cathy Putnam, 608.839.1092, cputnam@pfscorporation.com, or
Bob Gorleski, EIT, 608.839.1393, rgorleski@pfscorporation.com.**

PFS has many more exciting features planned for WebApp. We will notify you via Encore as each feature becomes available.
