### **Explanation of Chapter Superscript Codes**

Should one or more of the following superscript numbers <sup>(1,2,3)</sup> appear after a client's listing in various chapters of this book, it indicates:

<sup>1</sup> ... manufacturers who are also active in *the "California Factory-Built Housing or Components"* and the *"California Multi-Unit Manufactured Housing Program;"* or the *"Commercial Coaches and Special Purpose Commercial Coaches Program"* and who require PFS' service as either a Quality Assurance Agency (QAA) or as a Design Agency Approval (DAA), or both, under these California programs.

<sup>2</sup> ... manufacturers who actively support the PFS Certified Inspector Program.

<sup>3</sup> ... manufacturers who have model code acceptance. Refer to manufacturers' ICC-ES Evaluation reports for product specifications.
