PROFESSIONAL-IN-CHARGE AND CONTACT

The professional-in-charge and contact are listed below for the convenience of those persons who wish to contact the offices and efficiently direct their inquiry to the proper person. Supervision of each chapter is divided between technical responsibility and administrative responsibility. The professional-in-charge is responsible for all technical duties while the person listed as the contact is responsible for administrative duties. When in doubt, contact the person listed as the contact first. If the question is too technical for the administrator, he will ask the professional-in-charge for assistance.

PFS regional offices provide plan review, PIA services, quality assurance inspections, witnessing of testing, and code consulting.

The codes to the PFS regional offices found in this publication are as follows:
